ZO MAHEFA RANAIVO — SOFTWARE ENGINEER

Web & mobile. *DevOps.* QA.

I design and ship **reliable web and mobile applications**, automate their delivery and test them end to end. Based in Madagascar, available on site or remote.

ROLE_ WEB & MOBILE DEVELOPER · DEVOPS ENGINEER · QA TESTER

OPEN TO WORK · STAGE / APPRENTICESHIP / FREELANCE

SELECTED WORK

Fault Management Platform — 2025

WEB APP / DEVOPS · REACT, DJANGO, MYSQL

Built a production fault-reporting platform with a live status flow, technician management and a Leaflet map. Containerised the stack, automated delivery with GitHub Actions, used blue/green deployment and added Prometheus/Grafana monitoring.

github.com/Zomahefa/gestion-de-panne-devops

Hardware Store ERP — 2024 — 2025

FREELANCE PRODUCT · SPRING BOOT, REACT, POSTGRESQL

Designed an ERP for stock, sales, suppliers, customers and cash flow. Modelled the data, built a secured REST API and React dashboards, and packaged the environment with Docker. Private code; case study available on request.

Java · Spring Security · TypeScript · Docker

CI/CD & Observability Pipeline — 2024

PLATFORM ENGINEERING · DOCKER, GITHUB ACTIONS, NGINX

Built an end-to-end delivery chain for a React/Django/MySQL application on a VPS: automated build and tests, reverse proxy, blue/green release, Prometheus/Grafana metrics and Loki logs.

Docker · Nginx · Prometheus · Grafana · Loki

EXPERIENCE

2024 — NOW — Web & DevOps Developer
FREELANCE · PERSONAL PROJECTS
End-to-end delivery of business applications: Spring Boot/Django APIs, React interfaces, Docker, CI/CD and monitoring.

2024 — L3 Internship — CI/CD & Monitoring
PROFESSIONAL INTERNSHIP
Docker Compose, GitHub Actions, Nginx, blue/green deployment, Prometheus, Grafana and Loki for a fullstack web app.

2023 — 2024 — L2 Internship — Systems & Network
SPRAY INFO · FIANARANTSOA
Moodle deployment with video conferencing, Linux administration, user management and security; GNS3 and pfSense labs.

AVAILABILITY

Stage · Apprenticeship · Freelance
On site or remote · Reply within 48 business hours.

CORE STACK / HONEST LEVELS

PRODUCTION
JAVA · SPRING BOOT · POSTGRESQL · DOCKER · GITHUB ACTIONS · LINUX · REACT / NEXT.JS

OPERATIONAL
KUBERNETES · PROMETHEUS · GRAFANA · TERRAFORM · NGINX · REDIS · DJANGO

FAMILIAR
AWS · GCP · ARGOCD · ANSIBLE · VAULT · FLUTTER · KOTLIN

EDUCATION

M1 Computer Science — 2025 — 2026

BSc Computer Science — 2022 — 2025

ENI — École Nationale d'Informatique, Fianarantsoa. BSc with highest honours.

CERTIFICATIONS

Spring Boot — Mind Luster 2026

UML — Mind Luster 2026

LANGUAGES

French — fluent
English — technical (documentation and written collaboration)
Malagasy — native

CASE STUDY / FAULT MANAGEMENT PLATFORM

PROBLEM
Field incidents were reported and tracked without a central view, making priorities and traceability hard to maintain.

ROLE
Designed the reporting flow and admin dashboard, implemented live status tracking and a Leaflet map, then containerised and automated the delivery.

RESULT
A deployed and monitored application with a reproducible delivery pipeline and a clear view of every incident's lifecycle.

HOW I WORK

01 · FRAME
Goal, scope, risks and success criteria before code.

02 · BUILD
Short iterations, demos and documented decisions.

03 · SHIP
Tests, CI/CD, environments and a repeatable release.

04 · CARE
Metrics, logs, fixes and a clean handover.
